25 January 1983

MEMORANDUM FOR: Deputy Director for Intelligence
Chief, International Activities Division

FROM: Director of Central Intelligence

SUBJECT: National Strategy Information Center Symposium
"The Role of Special Operations in US Strategy
for the 1980's - March 4 and 5, 1983

I would like to participate in this but I think it is probably better that I don't. Do either of you think anybody else should, and, if so, who would you suggest? I am inclined to think we would do better to stay away.

However, I think that somebody should attend and bring back whatever insights and perceptions might contribute to our understanding and ability to explain the need and value of these activities.

William J. Casey
